

Protect yourself, your employees, and your clients from viral and bacterial infections!

THIS IS OUR TIME TO FIGHT COVID-19 TOGETHER!

Did You Know?

- While using a mask and keeping social distance, Bathrooms are still a main concern as far as pandemic spread. Bathroom cells are often small with small window for fresh air- or no windows at all.
- Research found out that sharing elevator with a Covid-19 carrier gives you a 40% chance to get infected as well.
- **While people can avoid using the dining room or manage meetings online, in both cases, the staying in restrooms or using the elevator is unavoidable.**

- ✓ **PXL Products use advanced ultraviolet C technology, which is fast, very reliable and cost effective**
- ✓ **Effective disinfectant: kills/ inactivates a wide range of bacteria and viruses**
- ✓ **Cost effective**
- ✓ **No chlorine by-products Non-corrosive**
- ✓ **Eco- friendly Easy to use**
- ✓ **Created by researchers, as an outcome of many**

- The UV light disinfection unit consists of light pulses, which are delivered by a xenon gas lamp.
- The pulses are created by compressing electrical energy into short pulses
- These pulses energize the xenon lamp
- This lamp emits intense light pulses in a broad spectrum, ranging from deep UV to infrared, and these pulses last microseconds
- PXL does not create byproducts like chlorine or other chemical toxins and the flashlamp is mercury-free, this technology is also environmentally friendly. Be aware that other UVC devices do contain mercury.
- **Is PXL Cost Effective?**
- ✓ Full training available
- ✓ Safety equipment included
- ✓ Bonus: an extra PXL lamp with your order.
- ✓ Free estimate available upon request.
